

[illegible]

FIG. 2

FIG. 2 is a schematic diagram of a square substrate 10. The substrate 10 is defined by a solid line 18b. It contains a grid of circular holes 30. A dashed line 18a defines a square region within the substrate 10. Inside this dashed region, there is a central square region 32, which contains a 3x3 grid of rectangular holes 50. The label 18a points to the dashed line, and the label 18b points to the solid line defining the substrate 10. The label 30 points to one of the circular holes, and the label 50 points to one of the rectangular holes in the central region 32.
